ESTA Error invalid street name

May 21, 2018, 11:37 AM

Save Topic

I just wanted to let others know my recent experience with the application. I found filling out the application infuriatingly not user friendly and with pretty much no support available apart from some obvious FAQ's. I could not proceed to the next stage of the form as the form kept returning to me saying ERROR and on scrolling down it said 'invalid street address' for my contact information and again for my work address. I tried to input the information in every possible way for three days but no luck. Then ... by a stroke of luck today I just happened to repeatedly hit 'next' and then I noticed that a check box had popped up asking me to check it to verify this address is correct! I had to check it then hit next again for the form to be returned again and then another check box popped up for my work address which I had to check and only then could I get to the next stage! Other than that I would still be at the computer...

I now finally have paid and 'application pending' for 72 hours. I am so relieved to be through this time consuming stressful process! I am still at a loss as to what caused the error but just wanted to put the information out there for others that may have the same problem.

Super helpful! Had same issue.

Thanks for the tip!

Well I'm getting the same problem, but can't see any checkbox! Using Chrome for Windows 64-bit.

Very usefull. I have the same problem. What you have to do is to submit the information again (one or two more times) without any change and finally a checkbox will appear to confirm the adress you are entering is correct.
